

Sarah Brereton joins Cambridge Healthcare & Biotech as Marketing & Administration Manager

CAMBRIDGE, UK, January 25, 2007 - Cambridge Healthcare & Biotech Ltd (CH&B) today announced that Sarah Brereton had joined the group as Marketing & Administration Manager.

Sarah has worked in life science consultancy for the last 9 years and has a great deal of experience not only in marketing consulting services but also in the creation and marketing of web-based information resources for biopharmaceutical companies.

Martyn Postle, Director and Founder of CH&B, said. "We have been asked by many of our clients to grant them access to the unique information resource that is the CH&B Database. Now Sarah has joined us we aim to make this information available on a subscription basis in the near term."

The CH&B Database

The CH&B Database has been built up over the last 40 months and continues to grow every day. The database is fully searchable and as at 25 January 2007 contained:

- profiles of over 5,600 companies active in life sciences;
- contact details for over 18,800 people who work in life sciences with brief biographies for over 12,900 of them including details of over 4,100 specific main board appointments;
- life science portfolios for over 330 equity investors cross-linked to over 3,100 specific investments; and
- company information cross-linked to almost 8,000 recent news items.

The CH&B Database can also be linked to other commercial databases such as Pharmaprojects© which allows search terms to span information inside and outside the CH&B Database

Cambridge Healthcare & Biotech

Cambridge Healthcare & Biotech is a knowledge-based consultancy serving all sectors of the healthcare industry. The company brings a unique perspective to solving client problems through an in-depth understanding of technology, product development, marketing, healthcare systems and corporate finance which is embedded in its project teams. In particular, the track record of its team in commercial and technical due diligence is second to none, enabling its
